

POSITION DESCRIPTION

Full Stack Developer /DevOps

ReadyTech (ASX:RDY) exists to help communities thrive, and ReadyTechers flourish on making that change happen.

They enjoy taking on challenges that matter to our customers, communities, and the world – and working to solve them with incredible technology that helps navigate complexity, while also delivering meaningful outcomes.

ReadyTechers are enterprising, and hungry to make a difference. But, more than ever, ReadyTechers are *ready for anything*.

POSITION DESCRIPTION

Title	Full Stack Developer	Location	UK
Report to	UK Support and Project Manager	Direct report(s)	N/A

The purpose of this role

Our products are mission critical to our customers and require technical support and development.

We are seeking a highly skilled and creative **Full Stack Developer** with a strong expertise on **UI/UX design and implementation using VueJS** and robust experience in **Java-based backend services**, and **Microsoft Azure** for cloud infrastructure and support. This role is primarily development focused but includes some technical support responsibilities, requiring a strong understanding of Azure services and environment troubleshooting.

You will play a pivotal role in designing, developing, and maintaining scalable web applications that deliver exceptional user experiences and reliable business logic.

The ideal candidate will have proven experience in accessibility, usability, and responsive design.

Based in the UK, this role will require collaboration with product team members based in the UK and Australia, and technology team members based in the UK, Australia, and Vietnam.

The key responsibilities of the role

- **Frontend (VueJS & UI/UX)** : Develop responsive, accessible, and visually engaging interfaces using Vue.js, Vuex, and Vue Router; collaborate with designers to implement user-centric features and workflows; maintain a scalable component library and enforce UI consistency; and optimise performance and ensure cross-browser/device compatibility.
- **Back-End: (Java)**: Build and maintain RESTful APIs and microservices using Java; Integrate with databases, third-party APIs, and internal services; implement robust error handling, logging, and security practices; and write unit and integration tests to ensure backend reliability.
- **Azure & Technical Support**: Deploy, monitor, and troubleshoot applications in Microsoft Azure, including App Services, Azure Functions, Key Vault, and Application Insights; support production and non-production environments, ensuring uptime and performance; Handle incident response, root cause analysis, and environment diagnostics; and collaborate with infrastructure and support teams to resolve platform issues

The ideal candidate will have these:

<ul style="list-style-type: none">• Skills	<ul style="list-style-type: none">• Excellent communication and collaboration skills; ability to explain technical concepts to non-technical stakeholders.• Strong problem-solving and troubleshooting abilities.• Up-to-date knowledge of development, DevOps, and cloud best practices.• Proficiency in deploying and managing Azure services.• Familiarity with design tools (Adobe XD, Sketch, Figma).• Strong understanding of VueJS, HTML, CSS, JavaScript, and Java.• Knowledge of relational databases (e.g., MS SQL).• Experience with responsive/adaptive design principles
<ul style="list-style-type: none">• Knowledge	<ul style="list-style-type: none">• Proficiency in deploying and managing Azure services.• Familiarity with design tools like Adobe XD, Sketch, or Figma.• Experience with responsive and adaptive design principles.• Strong understanding of VueJS, HTML, JavaScript, CSS.• Strong understanding of Java programming language and experience with Java application development, debugging, and optimization.• Knowledge of relational databases. E.g. MS SQL• Knowledge of exposing and consuming REST / SOAP services.• Knowledge of Azure Monitor for infrastructure monitoring and performance analysis is desired but not required.
<ul style="list-style-type: none">• Experience	<ul style="list-style-type: none">• 5 years of commercial software development experience• Experienced and confident in speaking directly with customers.
