

POSITION DESCRIPTION

UI Developer / DevOps

ReadyTech (ASX:RDY) exists to help communities thrive, and ReadyTechers flourish on making that change happen.

They enjoy taking on challenges that matter to our customers, communities, and the world – and working to solve them with incredible technology that helps navigate complexity, while also delivering meaningful outcomes.

ReadyTechers are enterprising, and hungry to make a difference. But, more than ever, ReadyTechers are *ready for anything*.

POSITION DESCRIPTION

Title	UI/UX Developer / DevOps	Location	UK - remote
Report to	UK Head of Service Delivery	Direct report(s)	N/A

The purpose of this role

Our products are mission critical to our customers and require technical support and development.

We are seeking a skilled DevOps Engineer a strong background in supporting production environments, and a solid background in UI/UX development, specifically using VueJS. This hybrid role demands a professional who can bridge the gap between robust infrastructure management and front-end development, ensuring both the reliability of our systems and the enhancement of user interfaces. The squad does not currently include a dedicated designer, so we are ideally looking for someone who can also contribute to design thinking, visual design, and user experience strategy. The ideal candidate will have proven experience in accessibility, usability, responsiveness and creating wireframes, mock-ups and prototypes.

Based in the UK, this role will require collaboration with product team members based in the UK and Australia, and technology team members based in the UK, Australia, and Vietnam.

The key responsibilities of the role

- UI/UX Development: Enhance ReadyTech's solutions by
 - Collaborating with design and development teams to create and enhance user interfaces using VueJS.
 - Implementing best practices in UI/UX design to improve user experience and interface performance.
 - Developing responsive, interactive web applications ensuring compatibility across various devices and browsers.

The ideal candidate will have these:

• Skills	• Ideally, take ownership of design tasks in the absence of a dedicated designer, including creating wireframes, mock-ups, and prototypes. • Excellent communication and collaboration skills, with the ability to work effectively in cross-functional and cross-country teams and convey technical concepts to non-technical stakeholders. • Ability to analyse complex issues, troubleshoot efficiently, and implement effective solutions in a timely manner. • Commitment to staying updated with the latest technologies, industry trends, and best practices in both DevOps and front-end development. • Strong visual design skills and an understanding of layout, typography and colour theory • <u>Production Support</u>: Provide expert-level support for production systems, troubleshooting issues, and implementing solutions to ensure high availability and performance. • <u>Collaboration and Documentation</u>: Work closely with development and operations teams to streamline processes, foster collaboration, and maintain comprehensive documentation of configurations and procedures.
• Knowledge	• Proficiency in deploying and managing Azure services. • Knowledge of Azure Monitor for comprehensive infrastructure monitoring and performance analysis. • Familiarity with design tools like Adobe XD, Sketch, or Figma. • Experience with responsive and adaptive design principles. • Strong understanding of VueJS, HTML, Javascript, CSS.
• Experience	• 3+ years of commercial software development experience • Experienced and confident in speaking directly with customers.
